

PICS for PECS™ 2010[©]

Welcome to PICS for PECS™ 2010[©]! This year we've added over 250 new high resolution images for use around the globe. We've also added new categories to make finding specific images easier, so open the disk in Explorer to take a look at all of these categories!

This CD contains all of the 2002 through 2009 PICS for PECS™ icons and **over 250 new icons for a total of over 2200 icons!** As with PICS for PECS™ 2009[©], this year's CD is a compilation of American English, Canadian English, British English and Australian English symbols—all of the variations are on this one CD.

Brad Almond of Pyramid Group Management in Newark, Delaware is our most amazing graphic artist for our worldwide companies, and he continues to draw our new pictures.

The images on this CD are in jpeg (jpg) format and will run in virtually any operating system as long as a suitable viewer application is installed to view them. Use them as you would any clip art images. This means that you must import these images into documents that support graphics in jpeg format. For example, the images can be imported into Microsoft Word® documents in a number of ways

We've included our favorite grids on this CD in Microsoft Word® format. To use these grids:

1. Open file: Double click on the size you want (Once the document opens, click in the first square)
2. Select INSERT
3. Select PICTURE
4. Select FROM FILE.
5. Once the picture window opens up, select the drive where you've inserted the PICS for PECS™ CD, open the IMAGES file, open the category you are choosing from and click on the picture you want.
6. If you are using the 2 ½ inch grid or the 4 cm grid or larger, you will have to resize the picture once you've inserted it. To do this click on the picture and then drag the corners until the image fills the box. Repeat this process throughout the entire grid until you've filled the page.
7. REMEMBER TO SAVE the document with a new title, though! Click SAVE AS and then rename the document.

Because the images are in high resolution jpeg format, you can enlarge them quite a bit before you see image degradation.

If you want to print a single image on a sheet and add a border, once you've pasted the image into your document, select the image, then select Format, then Borders and Shading, then select the box diagram

Now for the fine print: *Copyright, 2001-2010 by Pyramid Educational Products, Inc. All rights reserved. All images in this software are owned by Pyramid Educational Consultants who retains all rights not expressly granted. Selling or redistribution of any of the images for any commercial purposes is prohibited. Use of the images in electronic format, including on-line use and multimedia applications is prohibited.*

As always, thanks for using our images! If you have ideas for our 2011 CD, contact me at

lfrost@pecs.com.

Happy PECing! **Lori Frost**
